

Burgess Beds' superb Divan Collection - a range of stylish classic and contemporary divans designed to perfectly complement a variety of bedroom environments.

All Burgess beds are hand crafted in Great Britain and such is the confidence in our materials and craftsmanship, all products carry a ten year guarantee.

The timber used in the construction of our bedsteads, headboards and divans is FSC® certified.

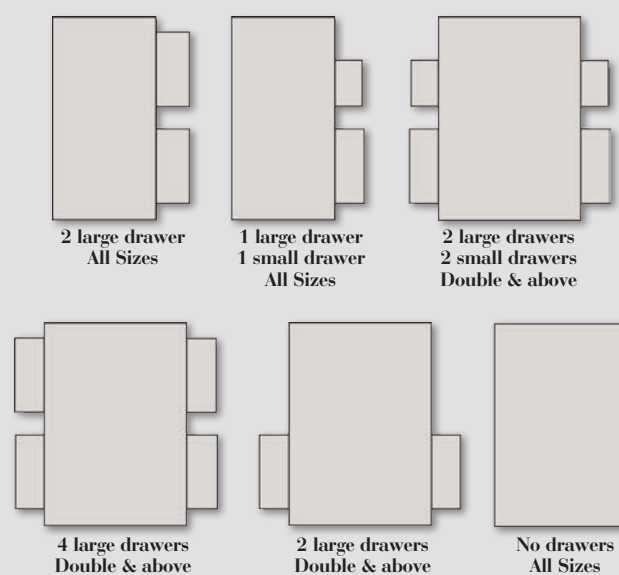

DIVAN COLLECTION

Burgess Edge to Edge Divans incorporate a spring system within a timber edge construction. The advantage of this is to firm the edges of the mattress above, avoiding the 'roll off' feeling whilst ensuring optimum edge to edge comfort & support over the full width of the sleeping surface.

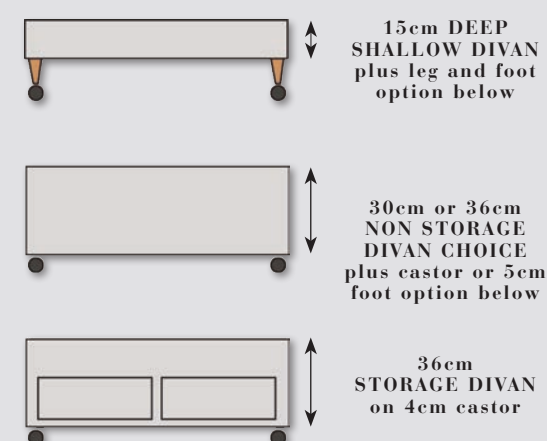

There is no difference in comfort if a drawer option is selected as the spring is the same depth.

- Double and King sizes are split East to West
- Superking Sizes are split North to South
- The linking system is hidden and is a latch on system
- The split is hidden by an upholstery flap
